Mitigating Bias in Artificial Intelligence

Prof. Sarah Jane Delany
BA (Mod) Mathematics, PhD (Computer Science)
Professor of Inclusive Computer Science,
School of Computer Science at TU Dublin.

With the recent interest in AI technologies, it's important to consider the risks associated with its widespread adoption. One of the challenges is in the area of fairness - AI systems can perpetuate and even amplify societal biases.

This talk will look at bias in AI systems, with a focus on gender bias, and discuss how to identify it and what can be done to mitigate it.

Speaker Bio: Prof. Delany is the TU Dublin lead of ML-Labs, the SFI Centre for Research Training in Machine Learning and a co-founder of the TU Dublin Applied Intelligence Research Center (AIRC). As the TU Dublin lead for CeADAR, the National Centre for Applied AI for a number of years and has worked with many companies on the application of data science and machine learning to their business.

Tuesday 1st April 1-2pm
Hamilton Institute Seminar Room, Eolas Building
