Research Seminar Series 2017-2018

‘Sustainable Mobility in Smart Cities and the Role of Open Data’

Dr Souleiman Hasan

Date: Wednesday, 16 May 2018

Time: 12.00pm

Venue: Eolas Meeting Room 1, Eolas Building

Paper Abstract

Mobility continues to be a key factor in the growth of cities around the world. With the movement to make our cities smarter, open data initiatives promise of a tremendous potential to improve mobility and its sustainability in smart cities. This seminar looks into the open data ecosystems in several smart cities and analyses the open data production and consumption sides of these ecosystems by looking into open data portals as well as selected case studies of open data infrastructure providers and app developers.

About the Speaker

Dr. Souleiman Hasan is a Lecturer of Management Information Systems in the School of Business and member of the Maynooth University Hamilton Institute. His research interests are in business data analytics, smart cities, and the Internet of Things. His research has appeared in venues such as the European Conference on Information Systems, Annual Meeting of the Academy of Management, International Conference on Persuasive Technology, Computer Journal, ACM Transactions on Internet Technology Journal, IEEE Internet Computing, and others.
